DETAILED ACTION

Receipt is acknowledged of the amendment filed 07/05/2011.

Withdrawn Rejections and Objections

The rejections under 35 USC 102(b) over Itoh et al. and Holt et al are withdrawn in view of applicant's amendment.

The objection to claim 17 is withdrawn in view of applicant's remarks.

Maintained Rejections

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29

USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 and 13-19 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-42 of copending Application No. 10/768,562 (US'562). Although the conflicting claims are not identical, they are not patentably distinct from each other because '562 an antibiotic composition comprising 1) a core comprising clarithromycin, (2) an inner coating comprising a cellulose polymer which is not an enteric coating polymer, and (3) an outer coating comprising at least one enteric coating polymer (claim 1). The cellulose polymers are listed at claims 5 and 6. Particle size is set out in claim 2 as between about 200 um to about 500 um. Plasticizers are listed at claims 7-9. Enteric coating polymers are found at claims 10-12. Oral suspensions are set out at claims 19-24. As

such those of ordinary skill would have expected similar therapeutic results from the instantly claimed composition and from the instantly claimed composition manufactured from the instantly claimed method. As such, the claims of the instant invention would have been obvious to one of ordinary skill in the art at the time of invention given the claims of copending US'562.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments filed 07/05/2011 have been fully considered but they are not persuasive.

Applicants asked that the rejection be held in abeyance until such time as allowable subject matter was identified. As such, the rejection is maintained in this action.
